Ali Molaali

Backend Developer Java / Spring Boot – Working Student | M.Sc. Web Engineering, TU Chemnitz

Leipzig, Germany · +49 152 52129062 · molaali.ali@gmail.com
github.com/ali-molaali · linkedin.com/in/ali-molaali-76aa0516a

PROFILE

Backend developer (Java / Spring Boot) with 9 years of professional experience, including 5 years full-time on projects for banks, energy utilities and public administration. Independently built a management platform for Oracle Service Bus that analyzes up to 20 million transactions per day at 5+ customers; experienced from requirements analysis and architecture through operations to team leadership. Master's student in Web Engineering at TU Chemnitz, seeking a backend working student position (up to 20 h/week, available immediately).

SKILLS

Languages: Java (8, 17, SE/EE), SQL, PL/SQL, JavaScript
Frameworks: Spring Boot 3, Spring MVC, Spring Data, Spring Security 6, Hibernate/JPA
Oracle Stack: Oracle Service Bus (OSB), Oracle BPM, Oracle ADF, Oracle WebLogic Server
APIs & Security: REST, SOAP, JWT, OAuth2, Swagger/OpenAPI
Databases: Oracle DB, PostgreSQL, MySQL
Frontend: Angular, HTML5, CSS3
Testing: JUnit, Mockito (basic)
DevOps & Infrastructure: Linux, Apache Tomcat, Git, Maven, CI/CD; Docker, Kubernetes (basic); AWS (currently learning)
Messaging: Kafka, RabbitMQ (basic)
AI: AI-assisted software development with coding assistants (GitHub Copilot, ChatGPT, Claude), LLM API integration (OpenAI, Gemini), prompt engineering, generative AI
Methods & Tools: Scrum, code reviews, Jira, Postman

WORK EXPERIENCE

Software Developer (Java / Spring Boot / Oracle) | Tosan – Tehran, Iran **09/2020 – 11/2025**
Software for banks, energy utilities and public administration · Full-time · Development team of 20+

- **Backend:** Developed and maintained 60+ REST and SOAP APIs with Java 8 and Java 17, Java EE and Spring Boot (Spring MVC, Spring Data, Spring Security)
- **Frontend:** Built user interfaces with Angular and Oracle ADF
- **Database:** PL/SQL development, database design, data migration and reporting in Oracle DB; reduced response times by 10–20% through SQL optimization, refactoring and pagination
- **Integration & performance:** Designed integration architectures with Oracle Service Bus; performance tuning via caching and load balancing for high load
- **Analysis & architecture:** Requirements and system analysis; designed application and database architectures
- **Operations & support:** Installation, release management, operations and 1st-level support at customer sites on Oracle WebLogic, Apache Tomcat and Linux servers
- **Team & communication:** Led a small developer team, code reviews, onboarding of new colleagues, 50+ first-round hiring interviews; close coordination with customers and other teams (operations, database, frontend) in Scrum

Selected projects:

- **Major client, 3 large-scale projects:** responsible for 20+ subsystems built with Java and Oracle ADF, 15+ of them with business processes in Oracle BPM; directly responsible for 3 Oracle Service Bus instances
- **Energy utility:** directly responsible for 2 Oracle Service Bus instances
- **"Cartable" (independent ownership, 1.5 years):** management platform for Oracle Service Bus, deployed at 5+ customers (banks, private and public organizations)
  - Backend development with Java 17, Spring Boot 3 and Oracle DB managing 1,000+ services and 1,000+ users
  - Analysis of up to 20 million service transactions per day per customer for logging, billing and dashboards
  - Access control, user management, JWT authentication and role-based authorization (Spring Security 6)
  - Usage control (limits/quotas), billing of paid services, API documentation with Swagger/OpenAPI

Software Developer (Java / Spring Boot) | Hamgam Information Technology – Tehran, Iran **06/2020 – 08/2020**

- Backend development of a workflow application with Spring Boot, including integration with an existing .NET backend
- Frontend contributions with Angular: UI components and REST API integration

Java Developer (part-time) | Pooyandegan Saaze Pey Afkan – Tehran, Iran **06/2016 – 03/2020**

- Developed an internal management system with Java, Hibernate/JPA and MySQL
- Implemented core modules: employee management, time tracking, room booking and reporting
- IT support and network/system administration

CERTIFICATIONS

Google AI Professional Certificate | Google **10/2026**
Generative AI · Prompt Engineering · AI-Driven Data Analysis · AI Application Development · Responsible AI

Java EE (J2EE) Developer Certification | Sharif University of Technology **2019**

React.js & Node.js | Sharif University of Technology **2019**

Oracle Database & PL/SQL Programming | University of Tehran **2019**

Java Standard Edition (Java SE) | Tehran Institute of Technology **2016**

EDUCATION

M.Sc. Web Engineering | Chemnitz University of Technology (TU Chemnitz), Germany **since 10/2025**
Expected graduation 2027 · Focus: web technologies, software architecture, cloud systems

M.Sc. Information Technology (E-Commerce) | Islamic Azad University, Qazvin, Iran **10/2012 – 09/2015**
Master's thesis: "Extension of intelligent supply chain model using association rules"

B.Sc. Software Engineering | Islamic Azad University, North Tehran Branch, Iran **10/2007 – 04/2012**
Bachelor's thesis: "Study of wireless sensor network localization techniques"
Iranian degrees evaluated by ZAB (German Central Office for Foreign Education).
